PROFILE

I build web, mobile and SaaS apps — from greenfield to legacy-system integration, including Brazilian e-invoicing (NFCe, NFe, MDFe). Since 2019 I've delivered solutions for field sales, financial controls, e-invoicing, internal dashboards, automations and enterprise integrations. I work across Delphi and modern stacks (React, Next.js, React Native), with APIs in Node.js, AdonisJS and PHP/Laravel running on Linux and Windows Server.

EXPERIENCE

Software Engineer · FG Sistema e Informática · Cuiabá, MT, Brazil — Jan 2026 — Present

Led delivery of four products integrated with a 20-year-old Delphi ERP without a rewrite: Ctrix Auto (mobile app for auto repair shops), Accountant Panel (eliminated monthly manual XML collection between support and accountants), an internal MDFe e-invoice API, and the company's institutional website. Stack in use: React, React Native, Node.js/AdonisJS, PostgreSQL, Docker, and Linux/Windows infrastructure.

React · React Native · Node.js · AdonisJS · Delphi · PostgreSQL · Docker · MDFe

L2 Technical Support · FG Sistema e Informática · Cuiabá, MT, Brazil — Jan 2024 — Jan 2026

Worked beyond the standard ticket scope: wrote Delphi routines, modeled and maintained client databases (PostgreSQL), issued and managed ICP-Brasil digital certificates, and handled Linux/Windows infrastructure. This phase served as the bridge to my move into software engineering at the same company.

L2 Support · Delphi · PostgreSQL · SQL · Digital Certificates

Software Engineer · Cacttus Brasil · Cuiabá, MT, Brazil — Jul 2021 — Jan 2024

Bootstrapped the company's corporate web system from scratch — by the end of my tenure it was already issuing NFe e-invoices in production. Built APIs in Node.js/Express, a field-sales mobile app in React Native, and administered servers for internal services. Also delivered the institutional website (listed under Clients).

Node.js · Express · React Native · React · PostgreSQL · NFe

Support Analyst · UNIBRASIL Sistemas · Cuiabá, MT, Brazil — Jan 2019 — Jun 2021

Started my career in L1 support for a legacy ERP: resolved tax-compliance tickets, handled usage questions, made direct database fixes (Firebird), and led on-site deployments with user training and machine/network maintenance. First serious exposure to NFCe e-invoicing — the foundation of the niche I've stayed in since.

L1 Support · Tax compliance · Firebird · Deployment · Infrastructure

SELECTED PROJECTS

Emittly — *In development*

Tax-compliance SaaS without the complexity of a full ERP. Customers issue Brazilian e-invoices (NFCe, NFe and MDFe) straight from the browser, with Stripe billing and a containerized architecture — PHP/Laravel API using the sped-nfe library and a React frontend.

React · PHP · Laravel · PostgreSQL · Docker · Stripe · sped-nfe

SecureVault · github.com/rafaelnassar/securevault

Local-first credential manager with AES-256 encryption. Built with Tauri for maximum desktop performance, focused on privacy and securing cryptographic keys and digital assets.

React · TypeScript · Tauri · Rust · SQLite · Tailwind

Painel do Contador *— under NDA*

Replaces the monthly manual collection of tax XML files. Previously support had to access each client's machine and email the files to the accountant. Now a Node.js sync agent uploads everything to Supabase Storage, and the accountant downloads what they need, when they need — without depending on support or the client.

React · Node.js · Supabase

Ctrix Auto *— under NDA*

Full mobile app for auto repair shops. Covers quotes, service orders, approval-by-link, and real-time status tracking for the shop's customer — including a waiting-room TV display module. Everything integrated with a 20-year-old legacy system.

React Native · Expo · Node.js · PostgreSQL

CLIENTS

Cacttus Brasil (cacttusbrasil.com.br) · **FG Sistema e Informática** (fgsistemaltda.com.br) · **Agrotippo** (agrotippo.com.br)

TECH STACK

Back-End	Node.js · AdonisJS · PHP · Laravel · Delphi
Front-End	React · Next.js · TypeScript · JavaScript · Tailwind
Mobile	React Native · Expo
Databases & Cache	PostgreSQL · MySQL · MariaDB · Redis
DevOps & Infra	Docker · AWS · Supabase · Linux · Windows Server · Git · Sentry

CERTIFICATIONS

Software Engineer Certificate — HackerRank, Jul 2025

Node.js (Intermediate) — HackerRank, Jul 2025

SQL (Advanced) — HackerRank, Jul 2025

Frontend Developer (React) — HackerRank, Jul 2025

JavaScript (Intermediate) — HackerRank, Jul 2025

EDUCATION

Associate Degree in Systems Analysis and Development
UNIASSELVI · Várzea Grande, MT, Brazil
Jul 2025 — Aug 2027 (in progress)

LANGUAGES

Portuguese (native) · English (intermediate)
