Rafael Nassar

Software Engineer

Cuiabá, MT, Brazil · +55 65 98134-2422 · adm.rafaelnassar@gmail.com · rafaelnassar.github.io · github.com/rafaelnassar · linkedin.com/in/nassarrafael

PROFILE

I build web and mobile apps, APIs and SaaS, focused on Brazilian e-invoicing (NFCe, NFe, MDFe) and ERP integration. I've been in the field since 2019: started as L1 support, moved to L2 (also as team supervisor) and grew into a software engineer within the same niche — ERPs, retail and Brazilian tax compliance. I work across Delphi and modern stacks like React, Next.js and React Native, with APIs in Node.js, AdonisJS and PHP/Laravel running on Linux and Windows Server.

EXPERIENCE

Software Engineer · FG Sistema e Informática · Várzea Grande, MT, Brazil — Jan 2026 — Present

Promoted to developer after meeting the requirements during my L2 phase. Currently responsible for the mobile and web sector: Ctrix Auto (auto shop app), Accountant Panel (automated monthly XML collection between support and accountant), an internal e-invoicing API (MDFe, NFCe and NFe) and the institutional website (listed under Clients). I work with Delphi when integration with the existing ERP is needed.

React · React Native · Node.js · AdonisJS · Delphi · MySQL · Docker · NFCe · NFe · MDFe

L2 Technical Support · FG Sistema e Informática · Várzea Grande, MT, Brazil — Dec 2023 — Jan 2026

Also acted as supervisor of the support team. Mixed work between support, programming and infra: Delphi routine adjustments to fix system flows, maintenance of legacy MySQL databases (4.1, with some clients still on 4.0), server and network configuration at customer sites, hardware maintenance and direct customer support. The more complex tickets and deployments usually came to me.

L2 Support · Delphi · MySQL · Linux · Deployment

Software Engineer · Cacttus Brasil · Cuiabá, MT, Brazil — Jul 2021 — Jan 2024

First full-time developer position, after a phase as a freelancer building simple websites and on-demand apps. Worked on the company's corporate web system (Node.js/Express + React), which during this period started issuing NFe e-invoices in production. Also built a React Native field-sales app and the institutional website (listed under Clients).

Node.js · Express · React Native · React · PostgreSQL · NFe

Support Analyst · UNIBRASIL Sistemas · Cuiabá, MT, Brazil — Jan 2019 — Jun 2021

First professional role after self-taught studies. L1 support for a legacy ERP: usage tickets, customer questions and occasional database fixes (Firebird). Joined on-site deployments and helped with user training. The system handled NFCe, NFe and SPED — my first hands-on with Brazilian tax compliance.

L1 Support · Firebird · NFCe · NFe · SPED · Deployment · Infrastructure

SELECTED PROJECTS

Emittly — *In development*

SaaS to issue Brazilian e-invoices (NFCe, NFe and MDFe) straight from the browser, without needing a full ERP. Stripe billing, PHP/Laravel API and React frontend.

React · PHP · Laravel · PostgreSQL · Docker · Stripe · sped-nfe

SecureVault · github.com/rafaelnassar/securevault

Credential manager that runs 100% on the computer (no cloud), with AES-256 encryption. Built with Tauri (Rust + web), focused on privacy.

React · TypeScript · Tauri · Rust · SQLite · Tailwind

Painel do Contador *— under NDA*

Replaces the monthly manual collection of tax XML files. A Node.js sync agent uploads files automatically to Supabase Storage, and the accountant downloads what they need, when they need — without depending on support or the client.

React · Node.js · Supabase

Ctrix Auto *— under NDA*

Mobile app for auto repair shops. Covers quotes, service orders, approval-by-link and real-time status tracking for the shop's customer — with a waiting-room TV display module. Integrated with the company's existing ERP.

React Native · Expo · Node.js · PostgreSQL

CLIENTS

Cacttus Brasil (cacttusbrasil.com.br) · **FG Sistema e Informática** (fgsistemaltda.com.br) · **Agrotippo** (agrotippo.com.br)

TECH STACK

Back-End	Node.js · AdonisJS · PHP · Laravel · Delphi
Front-End	React · Next.js · TypeScript · JavaScript · Tailwind
Mobile	React Native · Expo
Databases	PostgreSQL · MySQL · MariaDB · Redis
DevOps & Infra	Docker · AWS · Supabase · Linux · Windows Server · Git · Sentry

CERTIFICATIONS

Software Engineer Certificate — HackerRank, Jul 2025

Node.js (Intermediate) — HackerRank, Jul 2025

SQL (Advanced) — HackerRank, Jul 2025

Frontend Developer (React) — HackerRank, Jul 2025

JavaScript (Intermediate) — HackerRank, Jul 2025

EDUCATION

Associate Degree in Systems Analysis and Development
UNIASSELVI · Várzea Grande, MT, Brazil
Jul 2025 — Aug 2027 (in progress)
